

The RAF RM-10868 is a very well written proposal. I totally agree with all points with one exception. I would not, at this time, eliminate the VEC question pools or alter the examination process. To do so would be counter productive to the amateur radio service.

I urge the Commission to carefully review and give due consideration to RM-10868. I firmly believe it speaks for the majority of already licensed amateur's best interest, and will continue to give us an excellent pool of radio amateurs to help protect our future.
